

Every search makes an impact

# We're switching to **Ecosia!**

We are delighted to share the exciting news that **Ecosia will be the default search engine on all employee devices** from now on. The switch to Ecosia is another step towards integrating sustainability into our day-to-day work: With every search request we make from now on, we support tree planting projects all over the world.

## About Ecosia

Ecosia is the largest not-for-profit search engine and works just like Google—with one key difference: Ecosia dedicates 100% of its profits to the planet by planting trees and investing in renewables.

Please note: Ecosia is the new pre-installed search engine on your work device; however, you can switch to another search engine at any time. Take a look at Ecosia's [FAQ](#), which are provided specifically for organizations. If you have any questions, feedback or further suggestions, we look forward to hearing from you.
